Seeking Work-Study Contract - Game Developer - Game Designer

20 years old - Available immediately - MSc Gaming Campus Lyon

Having grown up with a Wii and Minecraft, moved from player to developer out of curiosity for what lies behind the experience.

Currently in my 3rd year of a Bachelor of Computer Science, Game Development track at Gaming Campus (Lyon), specialising in gameplay mechanics and gameplay systems.

Looking for a work-study contract as part of an MSc Game Developer at Gaming Campus (Lyon), alternating 3 weeks at the company with 1 week of remote classes.

EXPERIENCE

Game Developer
Internship Summer 2025 - 2 months

Le HuB e-sport - Valence

→ Independently designed and developed a cooperative video game integrated into the venue's event nights.
→ Core mechanic: chained dashes to bounce off the environment and defeat enemies.
→ Full end-to-end delivery - from concept to live public deployment.

`Unity` `C#` `Gameplay Systems` `Solo project`

IT Support
Sept. 2024

HM-Clause - Portes-lès-Valence

→ Handled multi-level support tickets independently and maintained IT equipment.
→ Implemented backup server cleanup procedures.

IT Department
July 2024

CPAM de la Drôme - Valence

→ Local virtualisation using WSL and Docker for simultaneous application deployment.
→ Hardware maintenance (OS, BIOS) and installation of a CentOS7 server.

PROJECTS

The Bookinist
Team of ~18 - 2 months

Narrative 2.5D puzzle game - awarded at the Rookie Awards 2026 (Highly Commended, Finalist, Draft Selection).

Role: *gameplay programming - movement, dialogue, UI, shop, save system & interactions*

`Unity` `C#` `Dialogue System` `Save System` `Core Gameplay` `Interaction System` `UI` `Shop & Inventory` `Asset Integration`

Procedural Generation & Portals
Team of 2 - 1 week

Exploration game with procedurally generated levels and chained biomes (plains, desert, snow), connected through a custom portal system.

Role: *procedural generation algorithm & portal system*

`Unity` `C#` `Procedural Gen.`

Rooms - Escape Game
Team of 2 - 2 weeks

Minimalist puzzle: the same room, subtly different at each level - playing on perception and spatial exploration.

Role: *level system & exploration logic*

`Unreal Engine 5` `C++` `Game Design`
