Seeking Work-Study Contract - Game Developer - Game Designer

Available from October 2026 - MSc Gaming Campus Lyon

Having grown up with a Wii and Minecraft, moved from player to developer out of curiosity for what lies behind the experience.

Currently in my 3rd year of a Bachelor in Computer Science, Game Development track at Gaming Campus (Lyon), specialising in gameplay mechanics and procedural generation.

Looking for a work-study contract from October 2026, as part of an MSc in Game Development at Gaming Campus (Lyon).

EXPERIENCE

Game Developer - Internship

Summer 2025 - 2 months

Le HuB e-sport - Valence

- Independently designed and developed a cooperative video game integrated into the venue's event nights.
- Core mechanic: chained dashes to bounce off the environment and defeat enemies.
- Full end-to-end delivery - from concept to live public deployment.

- Unity C# Gameplay Systems Solo project

IT Support

Sept. 2024

HM-Clause - Portes-lès-Valence

- Handled multi-level support tickets independently (incidents, hardware requests).
- IT equipment maintenance and rollout of backup server cleanup procedures.

IT Department

July 2024

CPAM de la Drôme - Valence

- Local virtualisation using WSL and Docker for simultaneous application deployment.
- Hardware maintenance (OS, BIOS) and installation of a CentOS7 web server.

PROJECTS

Procedural Generation & Portals

Team of 2 - 1 week

Exploration game with procedurally generated levels and chained biomes (plains, desert, snow), connected through a custom portal system.

Role: procedural generation algorithm & portal system

- Unity C# Procedural Gen.

Rooms - Escape Game

Team of 2 - 2 weeks

Minimalist puzzle: the same room, subtly different at each level - playing on perception and spatial exploration.

Role: level system & exploration logic

- Unreal Engine 5 C++ Game Design

Shaders & VFX - Crystal Quest

Team of 2 - 1 week

Real-time shader and visual effects showcase integrated into an adventure game - distortion effects, particles, and procedural materials.

Role: design and implementation of shaders & VFX

- Unity HLSL / Shader Graph VFX C#
